

Fam Pionki

Fam - Pionki

Hunting Ammunition Factory

Hunting Ammunition Factory Fam-Pionki Spółka z o.o. (Ltd.) was established in 1991 as a result of a restructuring and proprietary transformation process of the Zakład Tworzyw Sztucznych Pronit S.A. and continues the manufacturing of hunting ammunition, which was started after the War in 1948, by the Państwowa Fabryka Amunicji Myśliwskiej (National Hunting Ammunition Factory) PAWAM. The beginning of the ammunition production history in Pionki dates back to the twenties of the last century, when the famous nitrocellulose powder Sokół (Falcon) was manufactured here.

Over a period of more than 70 years, the ammunition from Pionki became known to hunters not only in Poland but also in other countries, and despite many twists, Fam-Pionki still exists to this day. In 2013 the factory became privately owned and the new Plant undertook a very difficult and courageous task - to restructure the company once again. The search for the best suppliers, changes of the manufacturing process and the implementation of process innovations, helped to achieve the intended target within a very short period. Thanks to the use of state-of-the-art and well equipped production lines, Fam-Pionki can boast of a wide range of 12, 16, 20 caliber hunting and sporting ammunition and 12 caliber special ammunition.

The goal of Fam-Pionki is to continue the tradition through constant improvement of the product quality and meeting the expectations of the customers. A young and visionary Management Board boldly sets new targets, raising the bar higher and higher. As a result of operating according to the ISO 9001 standard, the factory achieved a certificate of the Quality Management System and a certificate confirming meeting the criteria of the Internal Inspection System.

Today in Pionki, long and rich tradition joins with modern technology and a rapidly working team of specialists.

Fam-Pionki organizes and sponsors numerous shooting events, supports hunting competitions and for many years has been cooperating with the Polish secret services.

The offer of the company includes ammunition for Skeet, Trap, Parcour (with lead, as well as steel shot), hunting and slug ammunition, as well as special manufacturing for uniformed services.

We are confident that the quality and reliability of a wide range of Fam-Pionki ammunition will satisfy even the most demanding hunters and shooters.

Fam-Pionki - a new quality, let us surprise you!

Sporting Ammunition

Trying to meet the expectations of sport shooters, Fam-Pionki has developed fourteen lines of high quality sporting ammunition, adapted to the specifics of all Shot events.

Training

Ammunition designed for learning how to shoot, as well as intensive training of Trap and Skeet. The 21g shot load combined with properly matched powder, results in the fact that even after an intense training, we will not feel fatigue caused by excessive recoil.

Cartridge name	Caliber	Shot load [g]	Shot size [mm]	Velocity $V_{2,5}$ [m/s]	Wad	Crimp	Head [mm]	Cartridges per pack
Trap	12/70	21	2,25 2,40	390	plastic		10	25
Skeet	12/70	21	2,00 2,25	390	plastic		10	25

Olympic

A legendary line of sporting ammunition, very well known in the Polish and global markets, where it has been recognized by the best shooters for the ideal combination of high quality and a reasonable price. Carefully selected components guarantee repeatability, equal distribution of pellets and remarkable effectiveness.

Cartridge name	Caliber	Shot load [g]	Shot size [mm]	Velocity $V_{2,5}$ [m/s]	Wad	Crimp	Head [mm]	Cartridges per pack
Trap	12/70	24	2,25 2,40	390	plastic		10	25
Skeet	12/70	24	2,00 2,25	390	plastic		10	25
Trap	16/70	24	2,40	390	plastic		10	25
Skeet	16/70	24	2,00	390	plastic		10	25
Trap	20/70	24	2,40	390	plastic		10	10
Skeet	20/70	24	2,00	390	plastic		10	10

Olympic High Speed

Ammunition, which allows to significantly reduce target leading for Skeet and Trap. Increased velocity guarantees the certainty of breaking the clay target launched even at critical distances.

Cartridge name	Caliber	Shot load [g]	Shot size [mm]	Velocity $V_{2.5}$ [m/s]	Wad	Crimp	Head [mm]	Cartridges per pack
Skeet High Speed	12/70	24	2,00	430	plastic		10	25
Trap High Speed	12/70	24	2,40	430	plastic		10	25

Olympic Light

The Light line is characterized by a balanced, slight recoil, at the same time maintaining high effectiveness and even distribution of the shot cluster. Ammunition developed for shooters who value comfort at all kinds of competitions, as well as during quiet training.

Cartridge name	Caliber	Shot load [g]	Shot size [mm]	Velocity $V_{2.5}$ [m/s]	Wad	Crimp	Head [mm]	Cartridges per pack
Skeet Light	12/70	24	2,00	365	plastic		10	25
Trap Light	12/70	24	2,40	365	plastic		10	25

Disperser

Ammunition designed especially for Skeet. A unique structure of the container, which is equipped with a dispersion element (the so called disperser) ensure a very wide shot cluster even at small distances from the muzzle, which helps in firing at close distances.

Cartridge name	Caliber	Shot load [g]	Shot size [mm]	Velocity $V_{2.5}$ [m/s]	Wad	Crimp	Head [mm]	Cartridges per pack
Disperser	12/70	24	2,00	390	plastic		10	25
Disperser High Speed	12/70	24	2,00	430	plastic		10	25
Disperser	12/70	28	2,00	390	plastic		10	25

Special

Ammunition designed for Skeet and Trap. An ideal choice for shooters who value high effectiveness. The shot load increased to 28g in combination with the high velocity of 390m/s allows to break the hardest clay targets, even at large distances.

Cartridge name	Caliber	Shot load [g]	Shot size [mm]	Velocity $V_{2.5}$ [m/s]	Wad	Crimp	Head [mm]	Cartridges per pack
Trap Special	12/70	28	2,25 2,40	390	plastic		10	25
Skeet Special	12/70	28	2,00 2,25	390	plastic		10	25

Parcour

Ammunition designed for the fascinating discipline of Parcour.
The 28g shot cluster moving with a velocity of 400 m/s enables hitting even unconventionally moving clay targets.

Cartridge name	Caliber	Shot load [g]	Shot size [mm]	Velocity $V_{2,5}$ [m/s]	Wad	Crimp	Head [mm]	Cartridges per pack
								25
Parcour	12/70	28	2,00 2,25 2,40	415	plastic		10	25
Parcour BIOR	12/70	28	2,00 2,25 2,40	390	BIOR		10	

Precision

Precision Line combines the best of the best in terms of components for most demanding sport shooters. This cartridges guarantee PRECISION and the best pattern. This high quality ammunition line offers 24 and 28g loads, which makes it suitable for all shooting disciplines. 16mm high head and specially selected wads cause a very low recoil, which is why it will be perfect for training or at difficult competitions.

Cartridge name	Caliber	Shot load [g]	Shot size [mm]	Velocity $V_{2,5}$ [m/s]	Wad	Crimp	Head [mm]	Cartridges per pack
Precision	12/70	24	2,00 2,25 2,40	390	plastic		16	25
Precision	12/70	28	2,00 2,25 2,40	390	plastic		16	25

Master 5% antimony

Top-class ammunition designed for professional competition in shooting sports. Many years of experience, openness to all remarks and suggestions from the athletes and using excellent components, allowed us to create an ammunition line for the best competitors. Master with a 5% antimony shot ensures high efficiency, regular and even pattern.

Cartridge name	Caliber	Shot load [g]	Shot size [mm]	Velocity $V_{2,5}$ [m/s]	Wad	Crimp	Head [mm]	Cartridges per pack
Master Trap	12/70	24	2,25 2,40	390	plastic		23	25
Master Skeet	12/70	24	2,00 2,25	390	plastic		23	25
Master Trap	12/70	28	2,40	390	plastic		23	25
Master Skeet	12/70	28	2,00 2,25	390	plastic		23	25

Master Competition

Most of the top shooters in the world increasingly often choose the 2.25 mm thick shot as the best solution for Compak Sporting, Sporting and Double Trap competitions. This ammunition provides perfect pattern over larger distances and ensures better concentration of the shot cluster just off the target.

Cartridge name	Caliber	Shot load [g]	Shot size [mm]	Velocity $V_{2,5}$ [m/s]	Wad	Crimp	Head [mm]	Cartridges per pack
Master Competition	12/70	28	2,25	390	plastic		23	25

Master Open

Premium class ammunition, designed for competitors participating in tournaments of the highest rank. The distinguishing feature of the Master Open is a shortened container and pellets with a 5% addition of Antimony, which ensure greater diameter and regular pattern of the shot cluster just after the muzzle. Master Open ammunition is the best choice for shooting in Compak Sporting or Parcours de Chasse (Sporting).

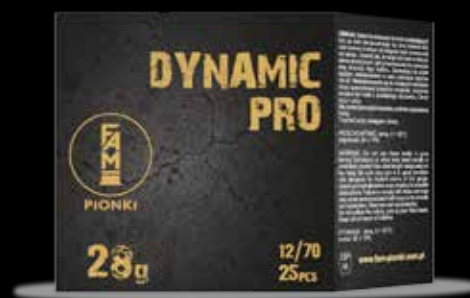

Cartridge name	Caliber	Shot load [g]	Shot size [mm]	Velocity $V_{2,5}$ [m/s]	Wad	Crimp	Head [mm]	Cartridges per pack
Master Open	12/70	28	2,00 2,25	390	BIOR		23	25

Dynamic

Ammunition dedicated to dynamic shooters. The things important at IPSC are dynamics and how fast a competitor moving around a specially designed track is able to fire at targets. During an event, the shooters can have anywhere from a few to few dozen tracks to cover, using large amounts of ammunition. This is why, its quality and reliability are such an important element. Dynamic is a safe and proven selection.

Dynamic Shooting

Cartridge name	Caliber	Shot load [g]	Shot size [mm]	Velocity $V_{2,5}$ [m/s]	Wad	Crimp	Head [mm]	Cartridges per pack
Dynamic	12/70	28	3,00	380	plastic		8	25
Dynamic Pro	12/70	28	3,00	380	plastic		12	25
Dynamic Slug	12/70	28	-	390	plastic		10	25

Practical Short

Ammunition used in guns equipped with a tubular magazine. Thanks to shortening the shell to a minimum, the magazine of the weapon can accommodate more rounds of ammunition. A high quality head combined with an adequately selected load velocity and mass ensure reliable operation even in heavily soiled automatic and semi-automatic firearms. Selected components guarantee repeatability, concentration and remarkable effectiveness.

Dynamic Shooting

Cartridge name	Caliber	Shot load [g]	Shot size [mm]	Velocity $V_{2,5}$ [m/s]	Wad	Crimp	Head [mm]	Cartridges per pack
Practical Short	12/63,5	28	3,00	380	plastic		10	25
Practical Short	12/63,5	32	2,40 3,00	380	plastic		10	25
Practical Short Slug	12/63,5	32	-	390	plastic	-	10	25
Practical Short Buckshot	12/60	32	8,45	380	plastic		10	25

Ammunition for CAS

„Cowboy Action Shooting”

CAS, which stands for Cowboy Action Shooting, requires taking a large amount of shots while maintaining precision and, above all, speed. Therefore, using traditional Wild West weapons for western disciplines requires special ammunition. Fan Western cartridges ensure decreased pressure when firing, while maintaining even pattern and reliability of the weapons, in the lever action, pump action, as well as the horizontal “coach” systems. Closing the cartridges with a top wad is also a nod to tradition.

Cartridge name	Caliber	Shot load [g]	Shot size [mm]	Velocity $V_{2,5}$ [m/s]	Wad	Crimp	Head [mm]	Cartridges per pack
Fam Western	12/70	24	2,40	350	plastic	○	10	25
Fam Western	12/70	24	2,40	350	fibre	○	10	25
Fam Western Black Powder	12/70	24	2,40	275	fibre	○	10	25

Hunting Ammunition

Ammunition, which has been accompanying hunters for many years in their hunting adventures.

Fam

Hunting small game, including wildfowl, has always required the use of reliable and effective ammunition. That is why, hunters from all over Europe value Fam ammunition, also for the availability of traditional cartridges with felt wad and a top crimp.

The standard 32g shot load was supplemented with 36g shot load cartridges for the 12/70 caliber and 28g or 30g for shooter who value moderate recoil.

Cartridge name	Caliber	Shot load [g]	Shot size [mm]	Velocity $V_{2,5}$ [m/s]	Wad	Crimp	Head [mm]	Cartridges per pack
Fam	12/70	28	3,50	385	plastic		10	25
Fam	12/70	30	4,00	385	plastic		10	25
Fam	12/70	32	2,00÷4,50	385	plastic		10	25
Fam	12/70	32	2,00÷4,50	385	plastic		10	25
Fam Felt	12/70	32	2,00÷4,50	385	fibre		10	25
Fam Disperser	12/70	32	2,00÷4,50	385	plastic		10	25
Fam	12/70	36	2,00÷4,50	380	plastic		16	25
Fam	12/70	36	2,00÷4,50	380	plastic		16	25
Fam Semi - Magnum	12/70	40	2,00÷4,50	375	plastic		16	10
Fam	16/70	27	2,00÷4,50	385	plastic		10	25
Fam	16/70	27	2,00÷4,50	385	plastic		10	25
Fam	20/70	24	2,00÷4,50	385	plastic		10	10

Fam Plus

This ammunition is characterized by high velocity and thick target pattern. It ensures effective shots, even at maximum distances and at fast moving game. This unique ammunition is also available in the 16/70 caliber for shooter who value light and handy weapons, but still want to get the best shot parameters.

Cartridge name	Caliber	Shot load [g]	Shot size [mm]	Velocity $V_{2.5}$ [m/s]	Wad	Crimp	Head [mm]	Cartridges per pack
Fam Plus	12/70	28	3,50	400	plastic		16	25
Fam Plus	12/70	32	2,00÷4,50	400	plastic		16	25
Fam Plus	12/70	32	2,00÷4,50	400	plastic		16	25
Fam Plus	16/70	27	2,00÷4,50	400	plastic		10	25
Fam Plus	16/70	27	2,00÷4,50	400	plastic		10	25

Top crimp

Fam-Pionki, as one of the few companies in the world, offers hunting ammunition traditionally closed with a top crimp. Thanks to the shot thickness designation placed on the crimp, one can quickly select visually the cartridges, which we want to put into the barrel. A top crimp combined with a felt wad is not only a century-old tradition, but also the certainty of ideal pattern of the target with the pellets.

Slug ammunition

Driven collective hunts are the source of the best emotions for most hunters. Variable and unpredictable weather conditions make most of the hunters go with combined firearms. It is important for the used slug cartridges to be characterised by the highest precision and effectiveness, which is why, for many years, the projectiles from our offer have proven themselves in the hunting grounds.

Cartridge name	Caliber	Slug load [g]	Velocity $V_{2,5}$ [m/s]	Wad	Head [mm]	Cartridges per pack
W-8	12/70	29,5	410	fibre	10	10
W-8 Plastic	12/70	29,5	400	plastic	10	10
FS	12/70	29,5	410	plastic	10	10
Dzik Original Brenneke	12/70	28,9	420	fibre	10	10
Rubin Sabot Original Brenneke	12/70	32	430	plastic	10	10
W-8	16/70	26	430	plastic	10	10
W-8 Plastic	16/70	27,5	410	plastic	10	10
FS	16/70	26	430	plastic	10	10
Dzik Original Brenneke	16/70	26,6	440	fibre	10	10
Atut	20/70	25,5	430	plastic	10	10
W-8	20/70	25	445	fibre	10	10

Buckshot

The buckshot type ammunition, is the perfect ammunition to defend domestic peace. In countries where it is permitted, it is successfully used for culling large predators. This ammunition can be used to force through obstacles, such as blocked doors.

Cartridge name	Caliber	Shot load [g]	Pellets per cartridge	Shot size [mm]	Velocity $V_{2,5}$ [m/s]	Wad	Crimp	Head [mm]	Cartridges per pack
Buckshot	12/70	32	38	5,00	400	plastic		10	10
Buckshot SG	12/70	32	9	8,45	400	fibre		10	10
Buckshot SSG	12/70	22	12	6,80	420	plastic		10	10
Buckshot	16/70	27	32	5,00	420	plastic		10	10
Buckshot SSG	16/70	22	12	6,80	420	plastic		10	10
Buckshot SSG	20/70	22	12	6,80	420	plastic		10	10

Signalling Ammunition

The cartridge contains a pyrotechnic star, which rises to about 60-80 meters after being fired, and ignites at the ascent altitude. The product is made of best quality components, which makes it completely safe for the weapon and the shooter. Fam-Pionki Signalling ammunition allows to not only add splendour to the setting of hunting ceremonies. It can also be useful for sending a prearranged signal or to indicate the location of a hunter's presence. Available in three colours: yellow, green and red.

Caliber	12/70
Weight [g]	mp ~ 7,5 g
Flash signal range	h ≥ 60m
Flash time	~ 4 s

Magnum Ammunition

Wherever maximum range and shot effectiveness counts, the Magnum type ammunition is the best choice. Top wad crimp, in combination with high shot load guarantees an effective shot, even at limit distances.

Cartridge name	Caliber	Shot load [g]	Shot size [mm]	Velocity $V_{2.5}$ [m/s]	Wad	Crimp	Head [mm]	Cartridges per pack
Fam Magnum	12/76	40	2,00÷4,50	390	plastic		23	10
Fam Magnum	12/76	45/50	2,00÷4,50	380	plastic		23	10
Fam Magnum	12/76	45	2,00÷4,50	380	plastic		23	10
Fam Magnum	12/76	52	2,00÷4,50	370	plastic		23	10
Magnum Buckshot	12/76	45	5,00	380	plastic		23	10
Magnum Brenneke	12/76	39	-	390	plastic	-	23	10

Magnum Buckshot SSG	20/76	22	6,80	420	plastic		16	10
Atut Magnum	20/76	25,5	-	450	plastic	-	16	10

Steel Ammunition

Olympic

Ammunition that satisfies the demands of shooters sensitive to the needs of contemporary environmental protections. The steel shot has an increased diameter to compensate for smaller mass. This ammunition is used in standard weapons and in the strengthened version with increased parameters.

Cartridge name	Caliber	Shot load [g]	Shot size [mm]	Velocity $V_{2.5}$ [m/s]	Wad	Crimp	Head [mm]	Cartridges per pack
Olympic	12/70	24	2,03 ÷ 2,79	390	plastic		10	25
Olympic	12/70	28	2,00 ÷ 2,60	390	plastic		10	25

Olympic High Speed

Olympic High Speed Steel line offers the best performance and pattern available. Specially selected wad and powder ensures maximum parameters and coverage. This high-speed steel load is ideal for short-range and high-volume shooting, in the skeet or compak sporting, whenever the use of environmental friendly shotshells is required. Thanks to a tighter pattern and increased velocity, this cartridges are able to break the clays at greater distances.

Cartridge name	Caliber	Shot load [g]	Shot size [mm]	Velocity $V_{2.5}$ [m/s]	Wad	Crimp	Head [mm]	Cartridges per pack
Olympic High Speed	12/70	24	2,03 ÷ 2,79	410	plastic		12	25
Olympic High Speed	12/70	28	2,03 ÷ 2,79	410	plastic		12	25

Dispenser

Fam – Pionki created this excellent shotshell for special situations in the short distance sport shooting. We use soft steel shots which, joined to the special cross wad. The newly developed Dispenser is by far the best steel cartridges on the market compared to other brands and patterns on a 10 meter distance. The pattern is up to twice as large - but still with great density.

Cartridge name	Caliber	Shot load [g]	Shot size [mm]	Velocity $V_{2.5}$ [m/s]	Wad	Crimp	Head [mm]	Cartridges per pack
Dispenser	12/70	24	2,03 ÷ 2,79	400	plastic		10	25
Dispenser	12/70	28	2,03 ÷ 2,79	400	plastic		10	25

Master

Master series steel ammunition - state-of-the-art ammunition, for which we use the most advanced technologies. This ammunition allows shooters to achieve record scores. A specially selected galvanized pellets are characterized by extreme hardness - does not deform - thanks to which the ammunition ensures even pattern. In combination with a carefully selected powder and a special wad, which fully protects the gun, it is characterized by a high firing comfort and is excellent for sporting events.

Cartridge name	Caliber	Shot load [g]	Shot size [mm]	Velocity $V_{2.5}$ [m/s]	Wad	Crimp	Head [mm]	Cartridges per pack
Master Steel	12/70	24	2,00 ÷ 2,60	390	plastic		23	25
Master Steel	12/70	28	2,00 ÷ 2,60	390	plastic		23	25

Fam Steel

Hunting small game, including wildfowl, has always required the use of reliable and effective ammunition. If you additionally look for highest quality, precision and are concerned about the environment - Fam Steel series is the perfect choice. That is why, hunters from all over Europe value Fam ammunition, also for the availability of traditional cartridges with felt wad and a top crimp.

Cartridge name	Caliber	Shot load [g]	Shot size [mm]	Velocity $V_{2,5}$ [m/s]	Wad	Crimp	Head [mm]	Cartridges per pack
Fam Hunting	12/70	30	3,05 ÷ 5,05	400	plastic		10	25
Fam Hunting High Speed	12/70	30	3,05 ÷ 5,05	430	plastic		16	25
Fam Hunting	12/70	32	3,05 ÷ 5,05	375	plastic		10	25
Fam Hunting High Speed	12/70	32	3,05 ÷ 5,05	410	plastic		16	25
Fam Hunting	12/70	35	3,05 ÷ 5,05	385	plastic		16	25
Fam Hunting	12/76	36	3,05 ÷ 5,05	410	plastic		23	10
